VOL. 1 ISSUE 1

dakota

This is the first issue of RED PAGES. It is necessarily incomplete due to the size of the task involved and various manpower/energy shortages we encountered. In no way do we intend to pass this off as a concise all encompassing guide to free Washington; but it is a start.

We are depending on the community to help us expand and become as complete as possible. We need information on ALL aspects of what there is around us. Advise us of changes, new stores and organizations; tell us about yourselves. Let us know if we are listing rip-offs...we try to check all our information but sometimes it is vague or hard to get. Help us to help you and we will all benefit together.

What more can I say? We think we are fortunate to be involved in something like this. Join us.

ecology & the people.

by BILL PAINTER, Ecology Center

During the last few years, there has been a growing concern about the future of the natural world which supports us. Ecology has changed from a topic for graduate student seminars to the subject of frequent conversations among all kinds of people. As the awareness of our environmental crisis has increased, ecology has grown from a science to a movement.

As the movement has gained numbers and strength, its scope has been broadened. The environmental movement was once composed primarily of people concerned with preserving wildlife and areas of natural beauty. They saved a number of species from extinction and set aside a number of wilderness areas. Much credit is due these early conservationists.

However, as our society became more urbanized, new problems arose. Large areas were affected by contamination of the air, water and land. More and more forests were cut to supply the ravenous demands of our exploding population. Millions of acres were buried under concrete and asphalt. The expansion of technology created changes which our culture could not adjust to.

So, now the emphasis of the environmental movement falls on pollution--the feces of technology. Environmentalists are concerned with urban problems, such as housing and transportation. Most of our population lives in cities, and it is the poor who suffer most from the hazards of our contaminated air and water. Yet, ironically,

poor people seem to have little concern for environmental problems. The reason for this is simple--they have more pressing problems to cope with. Specifically, the daily struggle to survive. But isn't survival the basic issue with which the environmental movement is dealing? This means we must expand our concept of environment beyond conservation and pollution. We must fight for the basic rights that are due all human beings--adequate food, water, housing and clothing; decent education; healthy recreation; meaningful employment; sufficient health care; and a community free of fear. As you search for the basic causes of our environmental crisis, you begin to see that many of the other problems we are facing--war, poverty, racism--are the result of the same things that are ultimately responsible for the destruction of our earth.

I feel that many of our problems can be traced back to repression, which results when one individual, group or species takes more than its fair share of the wealth that is offered by our society and our earth. Americans comprise about 7% of the world's population, but we use over 50% of the world's raw materials. It doesn't take much thought to see how this results in a foreign policy that is based on the domination of the world by the United States. Usually, economic power is sufficient to maintain our position, but sometimes areas such as Southeast Asia, require the application of physical power as well.

Our government says it is trying to help the "underdeveloped" countries progress so that they can come closer to our standard of living. Yet, can we really mean this? If all the people of this planet had the same standard of living as the average American, we would consume the world's resources of certain metals within a decade or two, and the supply of petroleum would be exhausted within a few years.

Blacks in this country sense this basic contradiction. Ecologists are calling for decreased consumption and less wasteful living, while millions of people in this country are undernourished. How can this be in a country that exports tons and tons of food each year? Once again, the resources of our country are not being fairly distributed among the members of our society. Until we can show the poor

that we believe that their standard of living should be raised, while the overconsumers release their grip on the world's resources, they will not feel that our efforts to free the earth and its people is closely related to their struggles to escape from hunger and fear.

So, what can an individual do? Basically, thinking ecologically means being aware that our actions have an impact that spreads far beyond ourselves. We must become more sensitive to the needs of other creatures, especially our fellow human beings. We can't stop technology in its tracks, but we can learn to use technology for human needs, rather than using people to satisfy the cancerous demands of technology.

Exactly how we can do this is a big problem. I think that an initial step is a dramatic alteration of our government to make it more responsive to all the people. We are going to have to study the present system, and learn how to take the power away from business and industry. The system is on the verge of collapsing under its own weight, and is definitely vulnerable to a number of approaches. More and more people are realizing the hypocrisy of our society, and are willing to

talk change. We have found that ecology is a good thing to start people in becoming radically aware.

Some of us will have to sacrifice lots of time that could be used for getting ourselves together and enjoying just living; and get into fighting the corruption of our present system. Others will get into spreading the message of life to other people, and helping them free themselves. Some will be exploring new life styles, and others will just be getting themselves together. All of these are essential, and we all have to support each other in doing our thing. There isn't much time left, so let's do it!

P.S. If you are interested in getting into ecology, or would like to rap about what I've said, call the Washington Ecology Center (833-1778) or drop by our office at 2000 P St. NW, Room 308.

"amazing" grace

Grace Church, Georgetown-- known as "amazing" Grace to our friends on and off the street -- has been serving the people of this neighborhood for over a hundred years. It was founded just after the Civil War as a parish for the working class families who labored in the wharf district of Georgetown. Late last spring history brought us full circle again as we began an experiment in serving a new generation of "the people"-- the loosely defined Free Community in Georgetown.

There is a lot of activity at "amazing" Grace. The Food Co-op has an outlet here on Thursday; WAFU sponsors a fantastic coffeehouse every Saturday from 8:00 till midnight; there are occasional community meetings on Wednesday to discuss the problems and hassles of the Free Community and to come up with ways we can help each other. We also have some counselling services for draft problems (Episcopal Peace Fellowship); dope problems ("Free Advice"); spiritual and religious problems; sometimes we work as mediators between runaways and their parents; and we counsel all types of troubled people. (In addition, "amazing" Grace has the most frequently used public johns in Georgetown!) Finally, we try to be prepared to respond to large demonstrations and similar crises by having a medical emergency team for on-the-spot first aid, and by providing a 'free zone' at the church when things get up* tight.

Aside from offering these services, we are also a church. We do the church thing every Sunday with both traditional services (9:00 and 11:00) and some far-out worship at 1:15 that we are calling God-Probes. We pray for the world, for peace; and for enlightenment in these times of darkness, trying to supplement the tangible help we can offer with some intangibles-- those good vibrations we need so badly. Christian groups have always been kind of out of it in the world and, although we're not much different, we are trying to turn that position on the sidelines into one of strength. By keeping away from vested interests and selfish power and holding firmly to a radical belief in non-violent love, we can encourage, enable and bring people together from a kind of detached point of view. We are trying to be a catalyst in the Georgetown scene, calling for co-operation and mutual concern in a time of fragmentation and isolation.

We do all this work with and for the freaks -- the new "untouchables" or "lepers" of affluent society. Some of us wierd Christians are kind of freaky ourselves. The reason is pretty simple and (don't get me wrong) it's anything but a put-down. After all, Jesus, our Liberator, hung around with the outcasts in his day, so we couldn't be keeping better company. The short time that Grace Church has been "amazing" Grace has brought the Free Community through some interesting changes. We'll carry on. Growing is sometimes hard, but it's going to be a beautiful day! Love is coming to us all. Let's discover the Dawn.

Peace and Freedom,

MARTY ADLER

Speaking of WAFU...

THE WASHINGTON AREA FREE UNIVERSITY
WANTS YOU

WAFU is what WAFU does which is to say that
we're less an institution or even a school than
a group of very human people, an idea, and an
ever-changing experience. We are a catalogue,
we are a coffee house, we are a directory of
community offerings (Red Pages), we are bake-
sales, rock concerts and pot luck dinners and,
above all, we are a kind of sand box, one
without walls.

PROCESS OVER CONTENT

Anyone gives a course, anyone takes a course -
interest is your only qualification. Courses
thrive or evaporate according to the extent to
which they meet participants' (your-my-our)
needs.

REMEMBER: ONLY YOU CAN PREVENT YOUR OWN
DEGRADATION

We survive to the extent that you perceive our
worth. We subsist on your support, be it help
with courses and projects, participation at the
meetings, donation of money and supplies
(especially mimeo paper & ink these days, please)
etc.

LEARNING FOR LEARNING'S SAKE

Come give a course, take a course, rap at
Tuesday meetings, create a coffee house on
Saturdays, do graphics, write articles, do
your thing.....BE A FREE YOU !!!!!!!

(see page 26)

on good days
i no longer look for white light
at the end of the tunnel,
but enjoy the subtle colors going past
that get brighter and deeper
if i take the time to look
and much prettier, perhaps,
than the light at the end.

: CREDO FOR LIFE:

I BELIEVE:

THAT MOST PEOPLE TODAY HAVE FORGOTTEN HOW REALLY GOOD IT FEELS TO FEEL REALLY GOOD.

THAT THE MOST IMPORTANT THING OUR MOVEMENT CAN DO IS REMIND PEOPLE, BY EXAMPLE, OF WHAT THEY HAVE FORGOTTEN.

THAT TO APPRECIATE DOPE YOU HAVE TO SMOKE IT, TO APPRECIATE SEX YOU HAVE TO BALL, AND TO APPRECIATE FREEDOM YOU HAVE TO BE FREE. YOU CAN TELL HOW FREE A MAN IS BY THE AMOUNT OF RESPECT HE HAS FOR FREEDOM.

THAT NO ONE IS MORE OPPRESSED THAN AN OPPRESSOR, BECAUSE A MAN'S BEHAVIOR IS THE RESULT OF HIS FEELINGS, AND A MAN WHO IS TRULY FREE IS INCAPABLE OF LIMITING THE FREEDOM OF OTHERS.

THAT HATRED IS THE RESULT OF FEAR, FEAR IS A CHAIN ON YOUR MIND, AND ANYONE WHO VOLUNTARILY ENSLAVES HIMSELF IS WORSE THAN A FOOL AND GETS EXACTLY WHAT HE DESERVES.

THAT IN ANY CONFLICT BETWEEN PEOPLE WHO THINK FOR THEMSELVES AND PEOPLE WHO ARE PROGRAMMED, VICTORY WILL RESIDE WITH THE THINKERS, BECAUSE THEY HAVE THE BEST TOOLS: IDEAS.

THAT ANY SOCIETY OR MOVEMENT WHICH CATERS TO PEOPLES' HANGUPS AND PREJUDICES, WHETHER FEAR OF "HIPPIES" OR FEAR OF "PIGS", IS AN OFFENSE TO HUMAN CONSCIOUSNESS, DOOMED TO FAILURE.

THAT AS LONG AS YOU THINK YOU HAVE ENEMIES YOU WILL NEVER GET YOUR HEAD TOGETHER.

THAT IT IS FOOLISH TO TRUST ANYONE WITH A PROGRAM FOR HUMAN HAPPINESS IF HE DOESN'T SEEM HAPPY HIMSELF.

THAT YOU CAN'T BE HAPPY AND ANGRY AT THE SAME TIME.

THAT "TOTAL FREEDOM" AND "TOTAL PEACE OF MIND" ARE TWO WAYS OF SAYING THE SAME THING, AND YOU CAN HAVE IT AS SOON AS YOU WANT IT, BUT YOU HAVE TO LEARN HOW TO GET IT.

THAT A PEACEFUL WORLD MEANS A WORLD FULL OF PEACEFUL PEOPLE, AND ANYONE WHO USES OR JUSTIFIES VIOLENCE IS DELAYING THE COMING OF A PEACEFUL WORLD.

THAT CONFIDENCE IS MORE USEFUL THAN IMPATIENCE, THAT GOOD CHEER IS MORE LIBERATING THAN PARANOIA, THAT IT'S BETTER TO TURN PEOPLE ON THAN TO TURN THEM OFF. YOU DON'T CATCH FLIES WITH SANDPAPER.

THAT MAN IS THE HIGHEST FORM OF LIFE ON THIS PLANET AND HE SHOULD ACT LIKE IT. STAY HIGH.

GIMME SHELTER

A new phase of Switchboard activities will be the Gimme Shelter housing co-operative. The co-op will keep on file a listing of rooms, apartments and houses for rent in the metropolitan Washington area. There are always people moving into our community for short periods of time and we would like to help them get their heads together without going through rip-off apartment locators. Also we'll try to keep lists of people who need roommates to share rent and/or company. If you can turn us on to any leads we will try our best to make them available to our brothers and sisters.

How can YOU help? If you are moving out, give us a call so we can have someone ready to take over (which will save your realtor money in advertising costs). If the place next door to you is vacant, let us have the necessary information to pass on—address, rent and utilities, deposits if any, landlord or realtors, etc. If you want someone to share your apartment, commune, house or room, we will try our level best to get it together for you. Help us help others like you. Remember, one day you may be homeless...give your brothers the chance you want. Give us a call at Switchboard, 387-5800 anytime.

P.S. Any undercover realtors will be welcome; no capitalism please.
